

KeypointDominantFusionNet Architecture

Straight-line CVPR figure derived from the provided PyTorch implementation

Faithfulness check: this figure matches the provided code structure: `_content_cue`, `v1/i1-v3/i3` encoders, `ca1-ca3`, `fuse_top`, `up2/dec2`, `up1/dec1`, `out_rgb`, `out_ir_w`, `target_y`, `pred_mix`, luminance ratio color recovery, and auxiliary outputs.

Connector convention: solid blue/red = VIS/IR feature flow; dashed gray = cue/skip buses; purple = fused decoder flow; green = output reconstruction.
